

**Pimpri Chinchwad Education Trust's  
Pimpri Chinchwad College of Engineering**

**ACM ICPC Awareness Session**

**Department:** Computer Engineering  
**CESA**

**Academic Year:** 2022-23  
**ACM**

**Type of Conduct:** online

**Title of the activity :** ACM ICPC Awareness Session

**Date of conducts :** 08/19/2022

**Category:** Technical

**Details:**

In the International Collegiate Programming Contest, college students compete in algorithmic programming. Students work in teams of three, representing their university, to solve the most real-world problems, fostering collaboration, creativity, and innovation. Training and competition challenges teams to raise the bar on what is possible. This is the world's oldest, largest, and most prestigious programming contest. To guide PCCOE Students about ICPC, a session was organized by Team CESA and PCCOE ACM Student Chapter. The speaker was Pankaj Jahagirdar, an alumina of PCCOE who himself was a participant of ICPC. His guidance surely helped a lot of students to understand the whole procedure.

**ACM Members Count :** 30

**Non ACM Members Count:** 50
